**Prof. Paul Mulvaney**

(Univ. of Melbourne, Australia)

○ Biography

Paul Mulvaney is currently Laureate Professor of Chemistry in the School of Chemistry at the University of Melbourne. He serves as an Associate Editor of the journal ACS Nano. From 2016-2019 he was a “1000 Talents Professor” at Chongqing Institute for Green and Intelligent Technology, China and also International Distinguished Fellow at the University of Bayreuth. He served as Chair of the RACI Colloid Chemistry Division from 2009-2011 and is a founding member of ACIS, the Australasian Colloid and Interface Society (2013). From 2014-2016 he chaired the National Committee for Chemistry under the Australian Academy of Science and led the group that created the first Decadal Plan for Chemistry. His recent research work, funded through the ARC Laureate Fellowship program (2011-2015) focussed on plasmonics - the optical properties of small metal colloid particles. He has published more than 330 research articles with an average of >150 citations per paper. His current role is Director of the new, 7-year ARC Centre of Excellence in Exciton Science.
